SKILLS

Loaders and loading states
Micro-interactions
Button and icon animation
UI transitions
Onboarding animation
Success and error feedback
Interface design and prototyping
Responsive mobile UI for iOS and Android
Visual hierarchy and consistency
Timing, easing and visual storytelling
Motion graphics and kinetic type
Video editing and finishing

TOOLS

Figma
Adobe After Effects
Adobe Photoshop
Adobe Illustrator
Adobe Premiere Pro
DaVinci Resolve
Lottie (Bodymovin) JSON export
AI-assisted workflow

LANGUAGES

Tamil, English

RAGUL SADHASIVAM

Motion Designer · UI/UX Designer · UI Motion Designer

Motion and UI/UX designer who cares how an app feels as well as how it looks. Designs interface screens in Figma and animates them in After Effects, with attention to timing, easing and visual storytelling: splash screens, loaders, pairing and loading states, navigation HUDs and brand motion. Motion is used with purpose: to show what the system is doing, direct attention and make transitions easy to follow, in the product's own visual language. Uses AI tools to explore ideas faster and refine results.

EXPERIENCE

Motion Designer / UI/UX Designer

Jan 2025 – Present

Moai Consulting LLP · Hyderabad, Telangana

Interface motion

- Designed and animated splash, onboarding, loading and pairing sequences for the Nuclyo and RYDYT apps so each system state is clear to the user.
- Created loading, connection and navigation feedback so users can see system state without reading text.

UI/UX design

- Designed screens and prototypes in Figma, then built After Effects animation that follows the product's layout, components and brand.
- Designed a glanceable compass navigation display for motorcycle handlebar use, with day and night legibility.

Brand motion & video

- Developed the RYDYT motion identity, covering logo reveals, kinetic typography and guidelines for campaign, app and showroom use.
- Created intro and reveal animations for vertical and widescreen formats and finished video in Premiere Pro and DaVinci Resolve.

Delivery & workflow

- Exported animations as JSON/Lottie assets using Bodymovin for developer handoff and integration into iOS and Android apps where required.
- Use AI tools to explore concepts and iterate faster on visual and motion ideas.

EDUCATION

B.Com · Bishop Heber College, Tiruchirappalli, Bharathidasan University — 2019–2022 · 63.31%

Class XII · Cheran Matric Higher Secondary School, Karur — 2019 · 70.82%

Class X · Cheran Matric Higher Secondary School, Karur — 2018 · 79.2%

PROJECTS

Nuclyo Splash Screen — 2026

Nuclyo CleanTech · 4 weeks | **After Effects · Lottie · Figma**

Brief. A launch animation for a smart clean-tech mobile app, the first moment a user has with the product.

Work. Designed organic vector motion that hands off directly into biometric authentication, so the launch and the sign-in step read as one continuous flow.

Nuclyo Logo Loader — 2026

Nuclyo CleanTech · 3 weeks | **After Effects · Lottie · Figma**

Brief. A branded loader to replace the generic circular spinner.

Work. Animated a rhythmic vector loader whose motion reflects sensor connection and air-health data, and exported it as Lottie JSON for lightweight, scalable use across mobile and web.

Nuclyo Bluetooth Pairing — 2025

Nuclyo CleanTech · 3 weeks | **After Effects · Lottie · Figma**

Brief. Feedback that reassures users while an IoT device is discovered and connected.

Work. Built a radar-wave pulse with radial easing that walks the user through detection, handshake and confirmed connection.

RYDYT Outline Loader — 2025

RYDYT Mobility · 2 weeks | **After Effects · Lottie · SVG · Figma**

Brief. A loading micro-interaction for telemetry loading, GPS lock and bike Bluetooth pairing.

Work. Animated an outline tracing the RYDYT badge, using continuous stroke trim paths so the loop repeats without a visible jump.

RYDYT Compass HUD — 2025

RYDYT Mobility · 4 weeks | **After Effects · Figma**

Brief. A directional compass for a motorcycle handlebar display, meant to be read in a quick glance at speed.

Work. Designed smooth rotation and a waypoint pulse that keep the rider oriented without distraction, with a high-contrast night mode.

RYDYT Brand Motion — 2025

RYDYT Mobility · 4 weeks | **After Effects · Illustrator · Premiere Pro**

Brief. A kinetic brand identity for a smart electric two-wheeler ecosystem.

Work. Combined bold dimensional typography with brand reveals, logo morphing and motion guidelines for campaign launches, app openers and showroom displays.

Born Creative Studio Intro — 2025

Born Creative Studio · 3 weeks | **After Effects · Premiere Pro · Figma**

Brief. A kinetic brand reveal and intro for a creative studio's showcases and reels.

Work. Paired typographic momentum with sharp dimensional transitions and custom easing curves, delivered for both vertical reels and widescreen.
